Intro

Easy dinner is a mobile IOS app that allows a user to store their food and adult beverage inventory, that can find recipes based on ingredients they already have. The app also allows them to find restaurants nearby for those times they do not have enough to cook with. The following is our research based on our prototype.

Script

For our interview we have a largely unstructured script, with the intentions of including certain information. Initially we establish a frame of mind. We inform the user about what the application is, what it does and how a prototype functions differently than a fully fledged application. We then ask them how they perceive the application, and if it seems to reach that goal. We also asked if this app meets their expectations based on their initial information or how it is different. As they continue through the app, we answer the questions they ask if any questions arise. We also ask questions along the way about types of dishes they would like to cook, and under what circumstances they might use this app. Once they have finished that component we then ask them if they feel familiar with the app. If the answer is yes, which it was in all cases we would then ask them to add an item. If it were no, we would help clarify, however that was not needed. During the process of adding an item we timed the user to see how long it took. Once that process was complete we went through the questions that were rated for agree to disagree and took their score. Along the way we would note their responses to these questions that were in addition to their numerical answers. We then thank them for their time and conclude the interview.

Questions and results from interview's

strongly disagree (1) (2) (3) (4) (5) strongly agree

Question	Subject One	Subject Two	Subject Three	Subject Four	Average
I think that I would like to use this app frequently.	4	4	4	2	3.5
I found the app unnecessarily complex.	1	1	1	2	1.25
I thought the app was easy to use.	5	5	4	4	4.5
I think that I would need the support of a technical person to be able to use this app.	1	1	1	1	1
I found the various functions in this app were well integrated.	5	4	4	4	4.25
I thought there was too much inconsistency in this app.	1	1	1	1	1
I would imagine that most people would learn to use this app very quickly.	5	3	5	5	4.5

I found the app very cumbersome to use.	1	1	1	1	1
I felt very confident using the app.	5	5	5	5	5
I needed to learn a lot of things before I could get going with this app.	1	1	1	1	1
Overall, I am satisfied with how easy it is to use this app.	5	4	4	4	4.25
Navigating through this app was easy and clear.	5	5	5	4	4.75
I was able to complete the tasks and scenarios quickly using this app.	5	4	4	5	4.5
I felt comfortable using this app.	5	5	5	5	5
It was easy to learn to use this app.	5	5	4	5	4.75
I believe I could become productive quickly using this app.	5	5	3	2	3.75

The app gave error messages that clearly told me how to fix problems.	1	1	1	1	1
Whenever I made a mistake using the app, I could recover easily and quickly.	5	3	4	3	3.75
The information (such as online help, on-screen messages, and other documentation) provided with this app was clear.	5	1	4	5	3.75
Time for adding item to inventory:	14 seconds	15 seconds	14 seconds	14 seconds	14.25

Interview's

Subject 1 (Cory's subject)

My subject asked if a delete function would be put into the pantry menu. As a first low-fi prototype, the delete button had not been put into the system yet. My subject also asked about home buttons on each page. The buttons will be added later. Overall the subject was very satisfied with how the application worked and did say they would use it on an everyday basis.

Subject 2 (Daren's subject)

My interview started with a brief description of the app. I then let the subject look through the functionality the app provides and I then asked a series of questions. The interview went well, the app was easy for this subject to use and he liked the idea. There was some confusion on a page of the app, the user did not know how to get back to the home screen. While there is a home button on multiple pages, this particular page we accidentally left out of the prototype. I chose this subject because he is a former CS graduate from SIUE and knows some interesting things to look for.

Subject 3 (Josh's subject)

My interview began explaining what the app did. I then explained how this prototype experience is slightly different from a fully functioning app since it is scripted. I first asked the user to just click around and explore the app. I asked them to let me know when they feel like they are comfortable with the program. After they had some time with it, I had them go to the main menu, and I timed them for the full process of adding an item. Afterward, I had them answer the questionnaire. Once that was done, we continued the rest of the interview in an unstructured manner. I was able to get feedback about areas that felt less clear or difficult than others. She is a working mother and likes the idea of the app to keep track of what she has in the house and what she can cook without having to go out.

Subject 4 (Josh's subject)

My next subject is a design student at SIUE. I followed the same process for her as I did with my previous subject. I explained how a XD prototype differed from a regular working app. I then explained what the application's use was. I asked her to go ahead and get familiar with the different sections on her own. As she would go along she would ask questions about certain functions and then mention how they pertain to her. She also brought up a few interesting

points. She feels like there is lots of clicking and would like less of that. She mentions that she does not know what the current inventory is when she is adding an item. This is something we can consider as a later feature. She also would like to see a feature that allows her to delete items from the inventory in case she cooks without using the app. She mentions she would not likely use an app like this since she cooks very simple dishes and does not want to put the effort in logging her inventory. I was able to get feedback on possible features that might streamline the app and make it more usable.

Team roles and task

Each member did an interview and questionnaire for those we interviewed. We then put our information obtained from the interviews into the above table and averaged the marks. Each member after receiving feedback from the interviewee changed the low-fi and re-asked questions in class to see if others also responded to the changes to the design. Each team member also would take on making adjustments to components of the design as they were available.

Prototype

The following are screen shots of the prototype tested in a web browser.

The following shows: Splash Screen, main menu, adding item(s), looking at inventory, finding a recipe, mixing a drink, or finding a restaurant.

WHISKY GINGER HIGHBALL RECIPE

The invigorating combination of whisky and ginger ale is a fresh take on a classic. A wonderful introduction to the world of Scotch, the Johnnie Walker Ginger Highball (sometimes known as a Mamie Taylor) enhances the unmistakable taste, rather than masks it, making it a perfect option for both the whisky novice and the whisky expert.

WHISKY SODA HIGHBALL RECIPE

An ideal option for a more relaxed occasion - Johnnie Walker and soda is a classic combination for when you want something as easy-drinking as it is smoky and flavorful.

Beloved by both Johnnie Walker veterans and those brand new to the world of whisky, the Soda Highball doesn't compromise any of the unique flavour profiles present in all Johnnie Walker blends.

WHISKY HOT TODDY RECIPE

Most often served in a brandy glass, the Whisky Hot Toddy is traditionally thought of as a Christmas cocktail, but the comforting warmth and smoothness of our Hot Toddy recipe make it the perfect drink for any time you need warming up.

WHISKY SOUR RECIPE

Try your hand at a Whisky Sour: made mouth by the contrast of the syrup and citrus flavours that perfectly complements the signature flavours of Johnnie Walker.

Served either over ice in a tumbler, or neat in a cocktail glass - the Whisky Sour is a classic that has stood the test of time.

WHISKY OLD FASHIONED RECIPE

Enjoy the unmistakable taste of Johnnie Walker stirred down with bitters and Angostura bitters. Although it's called an Old Fashioned, there's nothing outdated about this timeless cocktail with a smoky edge.

WHISKY RUSTY NAIL RECIPE

The Rusty Nail cocktail is an easy-going double hit of honeyed liqueur and Scotch, combining Drambuie and Johnnie Walker in a tumbler for a deliciously sweet cocktail.

Don't let the tough-sounding name put you off. This is one of the most approachable cocktails of them all.

WHISKY ALGONQUIN RECIPE

Named after a famous hotel in New York, frequented by the likes of poet Dorothy Parker and infamous critic Alexander Woollcott - the Algonquin is guaranteed to transport you instantly to warmer climes and more glamorous times.

An unusual and tropical take on a whisky cocktail - Johnnie Walker's Whisky Algonquin mixes Scotch, pineapple juice and vermouth for something truly spectacular.

WHISKY ROB ROY RECIPE

The spicy combination of sweet vermouth and aromatic bitters perfectly complements the signature flavours of Johnnie Walker - making the Rob Roy (also known as a Scotch Manhattan) a delicious occasion cocktail or aperitif.

Named after an opera based on legendary Scottish folk hero Rob Roy Macgregor, the Rob Roy is made exclusively with Scotch Whisky, whereas the Manhattan is more commonly made with bourbon. This can be said to give the Rob Roy more

WHISKY GINGER HIGHBALL RECIPE

The invigorating combination of whisky and ginger ale is a fresh take on a classic. A wonderful introduction to the world of Scotch, the Johnnie Walker Ginger Highball (sometimes known as a Mamie Taylor) enhances the unmistakable taste, rather than masks it - making it a perfect option for both the whisky novice and the whisky expert.

WHAT TO PUT IN A WHISKY GINGER HIGHBALL

INGREDIENTS:

- 45 ml Johnnie Walker Red Label
- 180 ml ginger ale
- A squeeze of lime juice

HOW TO MAKE A WHISKY GINGER HIGHBALL

METHOD:

1. Fill a glass with ice

Choose either a collins or highball glass and fill with cubed ice.

2. Add the ingredients

Add the whisky to your preferred glass, top up with ginger ale and add a squeeze of lime.

3. Stir

Stir lightly to combine.
